

Computer Level III

Excel

Students need to know about spreadsheets since they are used for many different class subjects. Learn how to use and modify rows, columns, and cells as well as entering data. mChange the look of a spreadsheet, add charts and use formulas and functions.

Internet & Computer Safety

Learn about computer viruses and worms and how you can avoid them. Find out about phishing scams and other internet dangers. Find out if it is legal to download and upload music without paying for it.

Comic Book Creation

Students will learn to digitally self publish stories by planning and writing a storyline, designing a layout, and using text and character art to tell a story. They will learn basic photo editing skills and be able to import photographs, drawings and clipart into their creation.

Film Making

Using green screen and special video editing techniques, students will create a film as a group project. They will create a script, use a video camera to film, and then edit the video and audio tracks to make their film.
